CyberWall Organization Cybersecurity Catalog

Welcome to CyberWall Organization. As a leading provider in the field of cybersecurity, CyberWall is dedicated to protecting your organization's digital assets from evolving threats. Our comprehensive suite of services and products ensures that your business remains secure, compliant, and resilient in today's complex cyber landscape.

Table of Contents

- Containment, Eradication, and Recovery
- Post-Incident Review
- Forensic Analysis

1. Consulting Services

Risk Assessment

Identify and assess potential vulnerabilities within your organization's IT infrastructure. Our risk assessment services include vulnerability scanning, threat modeling, and risk prioritization.

Compliance & Audit Services

Ensure adherence to industry regulations and standards with our compliance and audit services. We provide thorough audits, gap analysis, and remediation strategies.

Incident Response Planning

Develop a robust incident response plan tailored to your organization's needs. Our services include plan development, tabletop exercises, and readiness assessments.

Security Architecture Design

Design and implement a secure architecture to protect your organization's digital assets. We provide design recommendations, architecture reviews, and security enhancements.

2. Managed Security Services

24/7 Security Operations Center (SOC)

Monitor and respond to security incidents around the clock with our SOC services. We provide real-time threat detection, analysis, and incident management.

Intrusion Detection and Prevention Systems (IDPS)

Detect and prevent malicious activities within your system. Our solutions include real-time monitoring, alerting, and automated response.

Endpoint Detection and Response (EDR)

Safeguard endpoints with advanced EDR solutions. We offer continuous monitoring, threat detection, and response capabilities for your endpoints.

3. Threat Intelligence

Threat Hunting

Proactively search for hidden threats within your network with our threat hunting services. We utilize advanced techniques and tools to uncover and mitigate potential threats.

Vulnerability Management

Identify and address vulnerabilities within your systems. Our services include vulnerability scanning, risk assessment, and patch management.

Cyber Threat Intelligence (CTI) Feeds

Stay informed about emerging threats with our CTI feeds. We provide actionable intelligence on cyber threats and trends relevant to your organization.

4. Security Solutions

Network Security

Implement comprehensive network security measures to protect your organization's data. Our solutions include network segmentation, secure communications, and intrusion prevention.

Cloud Security

Ensure the security of your cloud infrastructure with our cloud security solutions. We provide cloud configuration reviews, data protection, and threat management.

Application Security

Secure your applications from vulnerabilities and attacks. Our services include application testing, code reviews, and secure development practices.

Identity and Access Management (IAM)

Manage and secure user access with our IAM solutions. We offer user authentication, authorization, and identity governance services.

5. Training & Awareness

Employee Security Awareness Training

Educate your employees on best practices for cybersecurity. Our training programs cover topics such as phishing prevention, password security, and safe browsing.

Phishing Simulation

Test your organization's resilience to phishing attacks with our phishing simulation services. We provide realistic phishing scenarios and assess employee responses.

Executive Security Training

Provide specialized security training for executives and key personnel. Our programs focus on high-level threats, risk management, and incident response.

6. Compliance Solutions

GDPR Compliance

Ensure compliance with the General Data Protection Regulation (GDPR) with our services. We provide gap analysis, policy development, and data protection strategies.

HIPAA Compliance

Meet the requirements of the Health Insurance Portability and Accountability Act (HIPAA) with our compliance solutions. We offer risk assessments, policy development, and training.

ISO/IEC 27001 Certification

Achieve ISO/IEC 27001 certification with our support. We provide gap analysis, documentation assistance, and audit preparation services.

7. Incident Response

Incident Detection and Analysis

Quickly detect and analyze security incidents with our incident response services. We provide tools and expertise to identify and understand security breaches.

Containment, Eradication, and Recovery

Contain and eliminate security threats with our response services. We assist in recovering affected systems and restoring normal operations.

Post-Incident Review

Evaluate and learn from security incidents with our post-incident review services. We provide detailed reports, lessons learned, and recommendations for improvement.

Forensic Analysis

Conduct thorough forensic investigations to understand the nature and impact of security incidents. Our services include evidence collection, analysis, and reporting.
